

IoTweek

11 - 18 October Stockholm

Carnival of IoT: First time in Stockholm, first time in Sweden.

IoT week is week full of events where participants will enjoy Internet of Things in a fun way.

The whole week follows the flow of Inform/Explain, Inspire, Connect and Get Prepared, and Start building! with all the events gathered round that topics. We expect 80-100 participants per event.

With aim both at general public as well as techies. With our events we want to break silos between established/big companies, startups and organizations. At the same time we want to connect like-minded people and inspire them to make their ideas happen. More information: www.IoTweek.se

IoT Week's Schedule:

Sunday October 11. Grand Opening @SUP46

3 pm - Drone racing

Monday October 12: @SUP46
